

TO ASSEMBLE THIS,  
YOU WON'T NEED  
ANY SPECIAL TOOLS

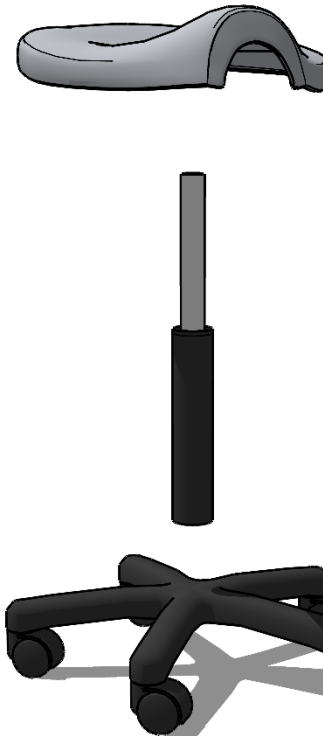

**1**

Push the casters or glides (depending on which version you opted for) into the holes on the underside of the five-star base.

**2**

Turn the five-star base over and simply place the gas lift and saddle seat onto each other.

**3**

Then take a seat – the weight of you sitting on it will tighten everything up.
